LIPHOOK DIABETES UK COMMUNITY GROUP

Diabetes UK records show that right now there are 4.5 million people in the UK with diabetes. In the South and South East alone it is estimated that over 584,000 people are living with diabetes. It is therefore essential that we find ways of managing this condition and communicating regularly with health officials and each other by sharing experiences.

Liphook Diabetes UK Community Group was formed in December 2016 and holds regular monthly meetings usually on Fridays in The Royal Anchor, The Square, Liphook. Details of each event are displayed in popular venues throughout the village.

We are an informal group who can offer help, support and an opportunity to meet others who are living with diabetes, along with coffee and a chat.

With the ever increasing population it is important that all our volunteer led community groups are considered when future housing developments take place. We are therefore here to help new people with diabetes feel confident that they can have the right support to enable them to settle happily in our community.

Further information is available from the above telephone number or email address.
